

# NFD-Android Enhancements

Ju Pan  
(Davide Pesavento)

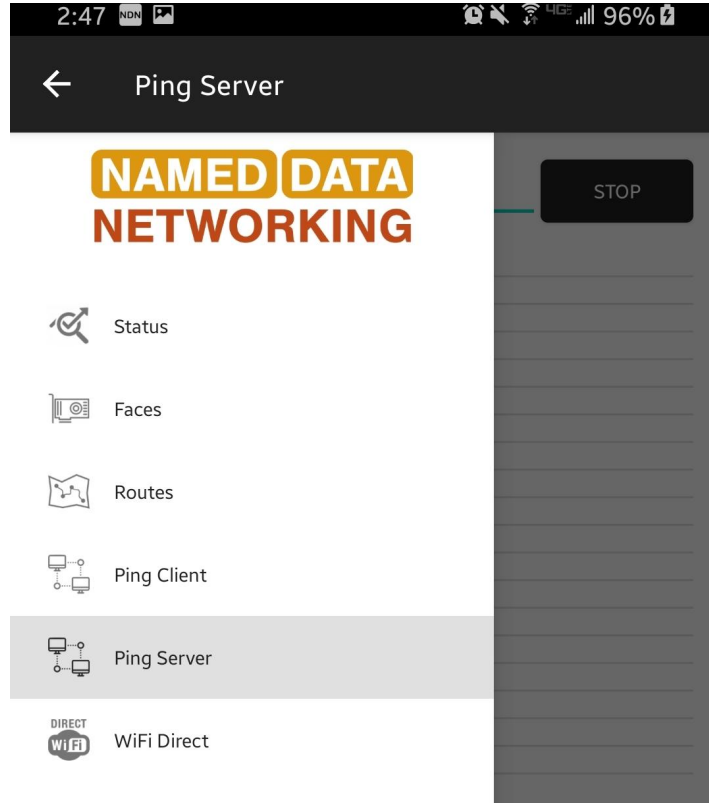

# Planned Tasks (4-person project)

- Add ndnping server and extend existing client implementation
- Allow changing strategy choices and content store configuration at runtime
- Modify global NFD settings from the app: face protocols, multicast, logging, ...
- Hub discovery improvements: Wi-Fi access point or IP gateway, DNS-SD, fix bugs, ...
- Bug fixes and stability enhancements (#4870, #4948, ...)
- UI/UX improvements

# Accomplished Tasks

- **Add ndnping server (#4765)** and extend existing client implementation
- Allow changing strategy choices and content store configuration at runtime
- Modify global NFD settings from the app: face protocols, multicast, logging, ...
- Hub discovery improvements: Wi-Fi access point or IP gateway, DNS-SD, fix bugs, ...
- Bug fixes and stability enhancements (#4870, #4948, ...)
- UI/UX improvements

# Half-way Tasks

- **Add ndnping server (#4765)** and extend existing client implementation
- **Allow changing strategy choices (#3462) and content store configuration at runtime**
- Modify global NFD settings from the app: face protocols, multicast, logging, ...
- Hub discovery improvements: Wi-Fi access point or IP gateway, DNS-SD, fix bugs, ...
- Bug fixes and stability enhancements (#4870, #4948, ...)
- UI/UX improvements

# Problem (Future work)

- jNDN management doesn't support retrieving strategy choice.
